HOOK

design by Karim Rashid

“Space is no longer a problem and display becomes value.”

The kitchen has rediscovered the beauty of everyday items and the pleasure of superior performance. Cookware and a hanging rail create a unique kit in high-gauge aluminium that can also be used on induction tops and in the oven. The high value of this design by Karim Rashid, is not just due to its originality but also to its ability to interpret the technological needs of the kitchen of the future.
