LIQUIDA

design by Angelo Di Porto

“The fluidity of metal creates unconventional shapes.”

The fluidity of metal creates unconventional shapes: here, materials and forms complement each other harmoniously to produce items with a refined, contemporary look.

Continuity, fluidity and elegance are the key concepts of Liquida, but the research has not been limited to aesthetic appearance: the best technologies have been exploited for cooking performances and for the ergonomic aspects of the utensils; this is why, in 2013, the range won the prestigious ADI Design Index Award for innovation.
