## CHARACTERISTICS

- Non-stick coating, built to last 3 times longer.
- The R3SISTEK by TVS interior coating is high thickness (>100 µm) for an even better non-stick performance with greater resistance to wear and tear, while also being easy to wash and able to withstand repeated dishwasher cycles.
- The steel handles have a special shape to provide a safe, versatile performance: safe, because the handles stay cold, even on the cooktop, and versatile because they are also oven safe.
- Top performance on any heat surface.
- The stainless steel disc means it works on all heat sources, including induction. Slits cut into the disc increase the stability of the cookware bottom, while the brushed surface guarantees a non-slip adherence to the cooktop.
- Lifetime warranty.
- All TVS non-stick coatings are free from Nickel, Heavy metals, PFOA and PFOS.
